

## Fish Passage Center

# Weekly Report #09 - 18

July 10, 2009

1827 NE 44th Ave., Suite 240  
Portland, OR 97213  
phone: 503/230-4099  
fax: 503/230-7559

### Summary of Events:

**Water Supply:** Precipitation throughout the Columbia Basin has varied between 37% and 337% of average at individual sub-basins over June. Precipitation above The Dalles has been 120% of average over June. Over the entire water year, precipitation has generally been near average.

**Table 1. Summary of June Precipitation and cumulative October through June precipitation with respect to average (1971-2000), at select locations within the Columbia and Snake River Basins.**

Location	Water Year 2009 June 1-29		Water Year 2009 October 1, 2008 to June 29, 2009	
	Observed (inches)	% Average	Observed (inches)	% Average
Columbia Above Coulee	1.61	70	18.10	89
SNAKE RIVER Above Ice Harbor	3.24	229	17.24	115
Columbia Above The Dalles	2.08	120	19.41	99
Kootenai	1.51	63	17.50	84
Clark Fork	1.50	80	14.33	101
Flathead	1.62	63	16.42	88
Pend Oreille/ Spokane	1.65	78	25.18	93
Central Washington	0.32	51	6.70	84
SNAKE RIVER Plain	3.12	337	11.11	116
Salmon/Boise/ Payette	2.53	178	16.69	95
Clearwater	2.24	93	28.63	107
SW Washington Cascades/ Cowlitz	1.06	37	58.72	90
Willamette Valley	1.83	84	47.98	86

Table 2 displays the June Final and July Final runoff volume forecasts for multiple reservoirs. The most notable differences between the June Final and July Final forecasts came at Libby Dam and Lower Granite Dam. At Libby, the July Final forecast decreased 11% relative to the June Final Forecast. At Lower Granite Dam, the July Final forecast increased 7% relative to the June Final Forecast, it appears most of the increase at Lower Granite was due to an increase in water supply above Brownlee Dam (increased 14%). The Water Supply Forecast at The Dalles between January and July is 89300 Kaf (83% of average).

**Table 2. June Final and July Final Runoff Volume Forecasts for various reservoirs within the Columbia and Snake River Basins.**

Location	June Final		July Final	
	% Average (1971- 2000)	Probable Runoff Volume (Kaf)	% Average (1971- 2000)	Probable Runoff Volume (Kaf)
The Dalles (Jan-July)	86	92000	83	89300
Grand Coulee (Jan-July)	85	53700	79	49600
Libby Res. Inflow, MT (Apr-Aug)	80	5000 5062*	69	4330
Hungry Horse Res. Inflow, MT (Jan-July)	93	2060	91	2020
Lower Granite Res. Inflow (Apr-July)	102	21900	109	23500
Brownlee Res. Inflow (Apr-July)	76	4780	90	5710
Dworshak Res. Inflow (Apr-July)	98	2590 2597*	97	2570

\* Denotes COE Forecast

The Spring Biological Opinion flow period began on April 3<sup>rd</sup> in the lower Snake River (Lower Granite) and ended on June 20<sup>th</sup>, 2009. The spring flow objective at Lower Granite this year was 100 Kcfs, average flow at Lower Granite over the spring period was 110.3 Kcfs. The summer flow period began on 6-21-09; the summer flow objective is 52.5 Kcfs in 2009 at Lower Granite. Flows at Lower Granite have average 77.0 Kcfs at Lower Granite over the first portion of the summer period and 64.9 Kcfs last week.

The spring flow objective period began on April 10<sup>th</sup> at Priest Rapids and McNary and ended on June 30<sup>th</sup>, 2009. The flow objectives this spring were 228 Kcfs at McNary and 135 Kcfs at Priest Rapids. Flows at Priest Rapids averaged 140.8 Kcfs over the spring season and flows at McNary averaged 268.1 Kcfs over the spring. The summer flow period began on July 1 at McNary and the objective is 200 Kcfs. Flows at McNary Dam have averaged 177.0 Kcfs over the first portion of the summer period.

Grand Coulee Reservoir is at 1289.1 feet (7-9-09) and refilled 1.5 feet over the last week. Outflows at Grand Coulee have ranged between 64.7 and 138.0 Kcfs over the last week. The Grand Coulee summer draft will be 1278 feet this year by August 31<sup>st</sup>, 2009.

The Libby Reservoir is currently at elevation 2435.1 feet (7-9-09) and has refilled 2.1 feet last week. Outflows at Libby are currently 8 Kcfs. Outflows at Libby are expected to decrease to 7 Kcfs (minimum bull trout flow) by July 12<sup>th</sup> and remain at this level through August.

Hungry Horse is currently at an elevation of 3559.1 ft (7-9-09) and has refilled 1.0 foot last week. Outflows at Hungry Horse have been 2.2 Kcfs last week.

Dworshak is currently at an elevation of 1595.4 feet (7-9-09) and has drafted 3.9 feet last week. Outflows at Dworshak are currently 7.4 Kcfs, however are expected to increase to full powerhouse if temperatures at the Lower Granite tailrace continue to be above 66°F.

The Brownlee Reservoir was at an elevation of 2074.1 feet on July 9<sup>th</sup>, 2009, drafting 2.1 feet last week. Outflows at Brownlee Dam have been 21.9 to 26.9 Kcfs over the last week.

**Spill:**

The 2009 planned summer spill program at the lower Snake River Projects began at 0001 hours on June 20, 2009. The following table shows the planned operations for 2009.

Project	Day/Night Spill
Lower Granite	18Kcfs/18Kcfs
Little Goose	30%/30%
Lower Monumental	17Kcfs/17Kcfs
Ice Harbor	30%/30% vs 45Kcfs/Gas Cap Study

All of the lower Snake River hydro projects met the court order over the past week.

The 2009 spring spill program began at the lower Columbia River projects ended on June 30<sup>th</sup>. The following table shows the planned operations for summer spill levels in 2009.

Project	Day/Night Spill
McNary	50%/50%* (beginning June 20)
John Day	30%/30% on pre-test days; 30%/30% vs. 40%/40% on test days
The Dalles	40%/40%
Bonneville	85 Kcfs/gas cap*(beginning June 21)

McNary Dam spill has met the Court Order over the past week. The COE implemented the summer spill of 50% beginning on June 20<sup>th</sup>, which will extend through August 31<sup>st</sup>. At John Day Dam the testing of 30% versus 40% continued. The Dalles Dam met the court ordered 40% level over the past week. Bonneville Dam spill levels met the summer spill test of 85 Kcfs/ Gas cap. The gas cap spill levels had been lowered due to TDG levels at the Camas/Washougal gage being in excess of 115% TDG due to the warm weather. (Note: Camas/Washougal is not a required point of compliance for TDG.) The gas cap level spill was increased on July 8<sup>th</sup>. The 85Kcfs/gas cap spill will continue until July 21, when the daytime spill level will decrease to 75 Kcfs.

Total Dissolved Gas levels were generally below the waiver standards throughout the Snake and Columbia rivers as flows continue to recede, except at the beginning of the week at the Ice Harbor and

Bonneville forebays. The Camas/Washougal monitor exceeded the 115% on July 4-5. However, there is no requirement to manage spill to this gage.

Gas bubble trauma (GBT) monitoring occurred at Little Goose and Lower Monumental dams in the Snake River, at Rock Island Dam in the Mid Columbia and at McNary and Bonneville dams in the lower Columbia. No fish were observed with signs of GBT in the sample at Bonneville Dam this past week.

**Smolt Monitoring:** Subyearling Chinook smolt collection and passage numbers remained high at McNary Dam and Bonneville Dam, while at Snake River projects numbers of subyearlings were lower but steady. Collection of Spring migrants continued to decline at all SMP sites in the Snake River and Lower Columbia this past week.

At Lower Granite Dam subyearling Chinook predominated with coho numbers having dropped off rapidly over the past week. Average daily passage index for subyearling Chinook was at 6,000 per day this week compared to 8,000 per day last week.

At Rock Island dam the daily passage indices for subyearling Chinook predominated in the sample, with indices averaging over 130 per day this week compared to nearly 90 per day last week. From July through August subyearling Chinook should predominate in the sample.

In the lower Columbia River subyearling Chinook smolt numbers rose rapidly this past week. At McNary Dam subyearling Chinook passage indices remained relatively high with the average daily index rising to 225,000 on July 8. At Bonneville Dam subyearling Chinook indices were down compared to last week; the index average just over 50,000 per day this week compared to over 94,000 per day last week.

#### **Hatchery Release:**

**Snake River Zone:** The Snake River Zone encompasses the Snake River and its tributaries from its confluence with the Columbia River to Hells Canyon Dam. There were no releases of salmonid juveniles scheduled to begin this week in the Snake River Zone. However, releases of subyearling fall Chinook surrogates to the Clearwater River continued this week. These releases began on June 29<sup>th</sup> and are expected to run through mid-July. In all, just over 117,000 subyearlings will be released throughout in this time frame. Although almost all of these fall Chinook surrogates are PIT-tagged, they are otherwise

unmarked. In addition, beginning on or around July 1<sup>st</sup>, approximately 300,000 spring Chinook parr were scheduled for release into the Selway River. This release may have continued into this past week. These parr are unmarked and are not expected to out-migrate until spring of 2010. There are no releases of juvenile salmonids to this zone are scheduled to begin over the next two weeks.

**Mid-Columbia Zone:** The Mid-Columbia Zone encompasses the area of the Columbia River and its tributaries from McNary Dam to Chief Joseph Dam. There were no scheduled releases of juvenile salmonids to this zone this week. There are no releases of juvenile salmonids to this zone over the next two weeks.

**Lower Columbia Zone:** The Lower Columbia Zone is defined as the Columbia River and its tributaries from Bonneville Dam to McNary Dam. No releases of juvenile salmonids were scheduled for this zone over the past week. Furthermore, there are no releases scheduled for this zone over the next two weeks.

#### **Adult Passage:**

The summer Chinook count began June 1<sup>st</sup> at Bonneville Dam. Daily passage numbers at Bonneville Dam ranged between 688 and 1601 adult summer Chinook in the last week. The 2009 summer Chinook count of 69776 is about 1.07 times greater than the 2008 count and 1.15 times greater than the 10 year average. The summer Chinook jack count of 32490 is about 3.24 times greater than the 2008 of 10040 and about 4.41 times greater than the 10 year average of 7361. The adult summer Chinook count at The Dalles Dam was 68313, about 97.9% of the Bonneville passage to date. A total of 46132 adult summer Chinook have passed McNary Dam. The 2009 McNary Dam adult summer Chinook count was about 1.09 times greater than the 2008 count and 1.11 times greater than the 10 year average. The 2009 McNary summer Chinook jack count of 17307 was 1.83 times greater than the 2008 count and 3.75 times greater than the 10 year average. The adult summer Chinook count at Lower Granite Dam in the Snake River of 11767 was 61.9% of the 2008 count and 1.29 times greater than the 10 year average. The Lower Granite summer Chinook jack count of 11712 was 2.59 times greater than the 2008 count and 5.72 times greater than the 10 year average.

The Bonneville Dam 2009 steelhead count of 24773 is about 87.3% of the 2008 count and 90.5% of the 10 year average. In the Snake River, this year's

Lower Granite steelhead count of 11851 is 1.43 times greater than the 2008 count of 8266 and 1.38 times greater than the 10 year average of 8563. The 2009 wild steelhead count as of July 8th was 3578. At Rock Island Dam, as of July 7th, 214 adult steelhead have been counted and at Rocky Reach Dam, 504 adult steelhead have been counted so far this season. At Willamette Falls Dam, the 2009 count for steelhead was 13955, as of June 30th. This year's steelhead count is only about 82.8% of the 2008 count of 16852 at Willamette Falls Dam for the same date range.

Daily adult sockeye passage numbers at Bonneville Dam ranged between 1288 and 4728 last week. The 2009 adult sockeye count at Bonneville Dam of 170384 is about 81.6% of the 2008 count of 208699 and about 2.30 times greater than the 10 year average of 73974. In the upper Columbia River at Priest Rapids Dam, the 2009 adult sockeye count of 95848 was about 64.1% of the 2008 count and 1.89 times greater than the 10 year average. Two of the major spawning sites for sockeye in the upper Columbia River zone are Lake Wenatchee and Lake Osoyoos (Okanogan basin). In the Snake River at Ice Harbor Dam, the 2009 adult sockeye count of 653 is about 1.56 times greater than the 2008 count of 418 and about 9.07 times greater than the 10 year average count of 72. The Lower Granite Dam 2009 adult sockeye count of 495 was about 1.21 times greater than the 2008 count of 410 and 7.73 times greater than the 10 year average count of 64.

As of July 8th at Bonneville Dam, the adult Shad count was 1366420 which was about 65.5% of the 2008 count of 2084775 and only about 44.4% of the 10 year average count of 3074604.

\* See sampling comments <http://www.fpc.org/currentDaily/smpcomments.htm>

Smolt indices, clipped & unclipped or combined, are presented in the following order: yearling chinook (chinook 1's), subyearling chinook (chinook 0's), steelhead, coho, and sockeye. Two classes of fish counts are shown in these tables: collection counts, which account for sample rates but are not adjusted for flow; and passage indices, which are collection counts divided by the proportion of water passing through the sampled powerhouse. Passage indices are not population estimates, but are used to adjust collection counts for daily fluctuations in the site's or project's operations. The classes of counts presented in the report are defined below for each site. Most samples occur over a 24-hr period that spans two calendar days. In this report, the date shown corresponds with the sample end date.

### Definitions for Smolt Index Counts

- WTB (Collection) = Salmon River Trap at Whitebird : Collection Counts
- IMN (Collection) = Imnaha River Trap : Collection Counts
- GRN (Collection) = Grande Ronde River Trap : Collection Counts
- LEW (Collection) = Snake River Trap at Lewiston : Collection Counts
- LGR (Index) = Lower Granite Dam Bypass Collection System : Passage Index Counts  
     Passage Index = Collection Counts / {Powerhouse Flow / (Powerhouse Flow + Spill)}
- LGS (Index) = Little Goose Bypass Collection System : Passage Index Counts  
     Passage Index = Collection Counts / {Powerhouse Flow / (Powerhouse Flow + Spill)}
- LMN (Index) = Lower Monumental Dam Bypass Collection System : Passage Index Counts  
     Passage Index = Collection Counts / {Powerhouse Flow / (Powerhouse Flow + Spill)}
- RIS (Index) = Rock Island Dam Second Powerhouse Bypass Trap : Passage Index Counts  
     Passage Index = Collection Counts / {Powerhouse 2 Flow / (Powerhouse 1 & 2 Flow + Spill)}
- MCN (Index) = McNary Dam Bypass Collection System : Passage Index Counts  
     Passage Index = Collection Counts / {Powerhouse Flow / (Powerhouse Flow + Spill)}
- JDA (Index) = John Day Dam Bypass Collection System : Passage Index Counts  
     Passage Index = Collection Counts / {Powerhouse Flow / (Powerhouse Flow + Spill)}
- BO2 (Index) = Bonneville Dam Second Powerhouse Bypass Collection System : Passage Index Counts  
     Passage Index = Collection Counts / {Powerhouse 2 Flow / (Powerhouse 1 & 2 Flow + Spill)}

JDA and BO2 data collected for the FPC by Pacific States Marine Fisheries Commission.  
 RIS data collected for the FPC by Chelan Co. PUD/Washington Dept. of Fish and Wildlife.  
 LGR, LMN, and MCN data collected for the FPC by Washington Dept. of Fish and Wildlife.  
 LGS and GRN data collected for the FPC by Oregon Dept. of Fish and Wildlife.  
 IMN data collected for the FPC by the Nez Perce Tribe.

BON and LGR have switched to video counts so the data is delayed.

\*PRD is not posting wild steelhead numbers.

These numbers were collected from USACE, Grant PUD, Douglas PUD, Chelan PUD, ODFW and DART.

Wild steelhead numbers are included in the total. Wild Steelhead are defined as unclipped fish.

Historic counts (pre-1996) were obtained from CRITFC and compiled by the FPC.

Historic counts 1997 to present were obtained from the Corps of Engineers.

Page last updated on: 07/09/09

BON counts from January 1, 2009 to March 14, 2009 (our traditional counts begin March 15):

Year	Chinook Adult	Chinook Jack	Steelhead	Wild Steelhead
2009	19	-1	321	109
2008	42	0	568	273
